CURRICULUM VITAE OF KAGISO MABUSELA

Personal Details

Surname	: Mabusela
Names	: Kagiso Cacius
Home Address	: 4365B Peolwane Street, Zone 4, Diepkloof, Soweto
Identity number	: 9711215039085
Nationality	: South African
Gender	: Male
Home language	: Northern Language
Other languages	: English, Isizulu, Setswana
Criminal Record	: None
Cell Number	: 064 255 6548
Email Address	: mrkcmabusela@gmail.com
LinkedIn	: www.linkedin.com/in/kagiso-mabusela-443203269
Portfolio	: https://thephoenix911.github.io/portfolio/

Educational History

1. Name of school : Fidelitas Secondary School

   Grade : 12

   Subjects : Accounting, Mathematics, Economics
   Business Studies, English, Sepedi, Life Orientation

2. Name of School : UNISA

   Course : Diploma in IT

   Year Completed : 2026

Credits	: 360/360 Completed
Average	: 75.8%
Status	: Academic Requirements Met; Pending Final Institutional Audit
Graduation	: May/June

Technical Expertise

- **Web Development:**
  - HTML5,
  - CSS3,
  - JavaScript,
  - PHP,
  - XML

- **Software Engineering:**
  - Java,
  - VB.Net

- **Data Management:**
  - MySQL,
  - Oracle,
  - SQLite

- **BI Tools:**
  - Metabase (Dashboarding & Data Visualization)

- **Systems & Support:**
  - Linux Administration,
  - Networking,
  - Hardware Troubleshooting

- **Tools & Analytics:**
  - Git (GitHub Desktop),

- MySQL Workbench,
- Metabase (Native SQL),
- Microsoft Office Suite

Technical Experience

Web Developer

Amandla Locker Booking System (School Project)

Sep - Nov 2025

- Programming Languages: PHP, JavaScript, MySQL
- Locker Booking System that allows parents to book a locker for the students.
- Admin can register a student/parent, book a locker, and suspend a locker (if the locker fee is not paid within 30 days)
- **Data Migration & Integrity Project (MySQL/Excel)**
  - Developed a robust workflow to transition raw legacy data into a structured relational database.
  - **Data Cleaning & Audit**: Analysed Excel datasets to identify and resolve data anomalies, duplicates, and formatting inconsistencies.
  - **Database Normalization**: Applied 1st, 2nd, and 3rd Normal Form (NF) principles to structure the data, ensuring zero redundancy and maintaining referential integrity.
  - **ETL Execution**: Successfully imported transformed data into a MySQL environment, creating specialized tables and relationships to support efficient querying.
  - **Verification**: Performed validation checks and wrote SQL queries to ensure data accuracy post-migration.

Freelance Web Developer: Motswako Communications

Mar 2023

- Programming Languages: JavaScript

- Approached a business owner to provide my web development services on a voluntary basis.
- The project's requirements frequently changed, and I had to adapt by applying iterative development. I interpreted the client's vision for the site through models and implemented through code.
- The overall experience was eye opening and educational – learning that building a website is more than just coding.

Web-based Database Application for a minimal Stokvel (School Project)

Jan – Sep 2023

- Programming Languages: PHP, JavaScript, MySQL
- Achieved +90% for this project
- Project requirements:

  The application must consist of three components:

  1. Users of the stockvel: Use a database table to store members of the stockvel. The application should allow adding new users, viewing all users, deleting existing users, and updating existing users.

  2. Monthly contributions: Use a database table to record contributions made by the members of the stockvel. The application should allow adding new contributions, viewing all contributions, deleting contributions, and updating contributions.

  3. Financial status: This element should allow a user to view the financial status of the stockvel. It should display the total amount currently saved in the stockvel as well as a summary of what each member has paid to the stockvel at a given time. Design the application using model view controller pattern.

FST Auto Service (partnered with Bosch Car Service) – School Project

Jan 2022 – Sep 2022

- Programming Languages: JavaScript (+AJAX)
- I achieved +95% pass mark for this project. The owner of the business was impressed that he asked that I develop an e-commerce website for his new business.
- I designed everything including the textual content for the site, but the graphical content was supplied by Bosch Car Service
- Available: https://thephoenix911.github.io/fstAutoService/

App Developer

Jul – Sep 2023

Bingo Game (School Project)

- Programming Language: Java, XML
- Achieved +90% for this project
- An android game that generates random unique numbers until a bingo is called. The user can view a list of called numbers and if it's a bingo, calls **Bingo!!!**
